EXP. NO: 09.
DATE:

Design A Simple Network Topology Using CISCO Packet Tracer.

Aim:

To design and configure a network using one router, two switches and four PC's in cisco packet tracer and verify communication between devices.

Procedure:

1. Open Cisco Packet tracer.
2. Add one router, 2 switches, 4 PC's.
3. Connect devices using copper Straing through cables
4. Config router interfaces with IP address 192.168.1.1 and 192.168.2.1
5. ~~Assign~~ IP address, subnet masks and default gateways of all 4 PC's.
6. Enable the router interfaces using the no shutdown command.
7. Open PC command prompt and use ping command to test connectivity b/w PC's.
8. Check ping command to verify successfull communication.

Result:

Thus, a simple network topology was designed and configured successfully.
