Exp.No: 13
Date:

Demonstrate Network Forensics using PCAP x-Ray Tool.

Aim:

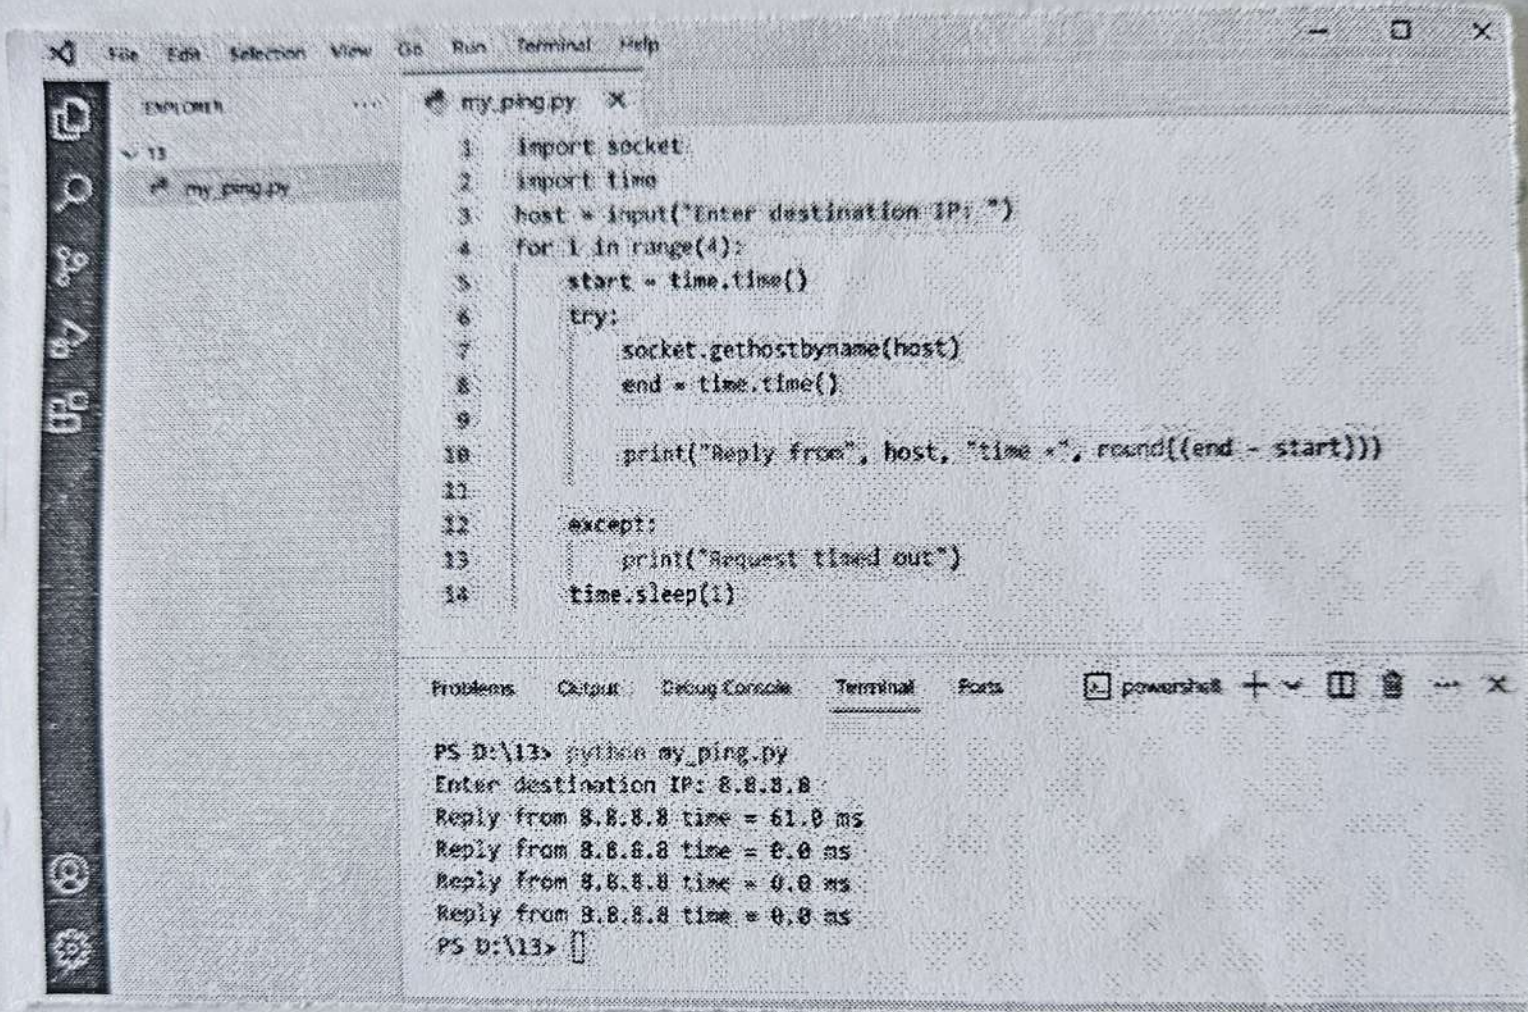

To perform network forensics by analyzing a PCAP file using PCAP x-Ray tool to identify network protocols suspicious activities, communication platform and transferred files.

Procedure:

1. Open a web baned and navigate to PCAP x-Ray website
2. Select a sample PCAP file from your computer.
3. Click upload and wait for analysis to complete.
4. Observe dashboard for total packets protocol and source and destination IP addresses.
5. Analyze the protocol distribution such as TCP, UDP, HTTP, HTTPS, DNS and ICMP.
6. Generate and save the analysis report if option is available.

Result:

Thus, network forencies was performed successfully using PCAP x-ray tool and network protocols, communication patterns, transfered files were analyzed.
